

**Topic 5**  
**SCREEDS**

Worksheet No.8

*Additional exercises*

Tasks for laboratory practicals:

1. Make a solution for traditional screed – cement-sand mortar / water in a ratio of 1:1.
2. Measure the consistency of the solution with a measure cup beaker.
3. Measure the bulk density of a sample that has been left for at least 24 hours and measures 5/5/5 cm.
4. Measure the compressive strength of the sample with dimensions 10/10/10 cm.
